

Login VSI for Load Testing

Login VSI is the industry standard load-testing tool for virtual desktop environments. Login VSI will generate a large number of synthetic users to test, and to protect, the performance and scalability of new and existing SBC, VDI, and DaaS/SaaS deployments.

Login VSI is available to end-user organizations as a key component of the Login VSI Enterprise Edition, Login VSI is available to IT vendors as our Login VSI Vendor Edition.

Login VSI is 100% vendor-independent and works perfectly with VMware Horizon, Citrix XenDesktop, Citrix XenApp and Microsoft Remote Desktop Services (RDS). Also users and providers of DaaS and SaaS cloud-solutions such as Microsoft Azure, Amazon Web Services and many others, will benefit from our easy to install, easy to use solutions.

Login VSI is especially suited for:

- Pre-production virtual desktop infrastructure benchmarking, sizing and scaling
- Testing different scenarios including load-testing, stress-testing, and log-on storms
- Impact validation of planned application upgrades and updates in production
- Impact validation of regularly planned smaller changes (think of patch Tuesday)
- Headroom calculations to help plan for an expected growing user population
- Quantifying the exact impact (and investment case) of innovations such as GPU

Login VSI feature highlights

- Easy to install and use: Login VSI does not require any special infrastructure and uses standard Windows-based hardware
- Vendor agnostic: Login VSI works with every Windows-based virtualized desktop solution (including all SBC, VDI and DaaS solutions)
- Turn-key workloads: Login VSI offers 5 representative user profiles out-of-the-box
- Industry specific workloads: Login VSI has a library of industry specific workloads
- Easy customization: If required workloads can be adapted or fully customized
- Easy to understand: Patented statistics like VSI_{max} (scalability) and VSI_{base} (end-user experience) offer a common language for interpreting and comparing results
- Multi-language/multi-version: Login VSI supports every Windows OS and every MS Office version, in any language, that Microsoft supports
